Faughart Community National School Energy Statement

At Faughart Community National School, we are committed to responsible energy management to reduce our environmental impact, lower costs, and create a more sustainable learning environment. We recognise the importance of energy efficiency in safeguarding our planet for future generations and aim to lead by example within our school and wider community.

Our Objectives

- To promote energy efficiency throughout the school.
- To reduce energy consumption through simple, practical changes.
- To educate and involve students, staff, and parents in our energy-saving efforts.
- To comply with energy legislation and best sustainability practices.

Our Targets & Expectations

- Reduce our energy use by at least 5% per year through good habits and simple improvements.
- Encourage all staff and students to actively participate in energy-saving initiatives.
- Monitor and track our energy consumption to identify areas for improvement.

How We Will Achieve These Goals

- Raise awareness through posters, announcements, and classroom discussions on energy conservation.
- Implement good housekeeping measures, such as switching off lights, computers, and appliances when not in use.
- Conduct annual reviews of our energy performance and set realistic improvement goals.
- Ensure contractors and suppliers align with our energy-saving values.

Through these actions, Faughart Community National School is committed to making energy conservation a priority, benefiting both our school and the environment.

Jacqui McCusker, Principal
